CAREER OBJECTIVE

Aspiring Data Analyst with hands-on experience in data cleaning, exploratory data analysis, SQL, Python, Pandas, NumPy, Excel, Power BI, statistical analysis, KPI reporting, and interactive dashboard development. Seeking an entry-level Data Analyst role to transform raw data into actionable insights through data preparation, analysis, visualization, and structured reporting.

EDUCATION

Malla Reddy Institute of Engineering and Technology

B.Tech, Computer Science Engineering

CGPA: 9.41 | 10/2022 – 08/2026 | Telangana

PROJECTS

Startup Ecosystem Intelligence & Funding Analysis | 2026

- Performed end-to-end data preparation and exploratory analysis on startup funding data from 2015–2020, standardizing 112+ inconsistent city values and 821 raw industry/vertical strings into structured categories.
- Built a Python ETL workflow using Pandas and regular expressions to clean dates, normalize currency values, identify undisclosed funding, and apply a split-allocation rule for multi-city deals to prevent double counting.
- Developed SQL analytical views using SQLite/MySQL to evaluate funding amounts, deal counts, city concentration, sector performance, and risk/volatility patterns; exported analytical outputs to Excel.
- Created an interactive dashboard with Year, Location, and Sector filters, dynamic KPIs, leaderboards, trend analysis, and SQL query functionality.
- Analyzed \$38.14B in disclosed funding across 3,077 standardized deals and identified key geographic and sector-level funding patterns based on the project dataset.
- Applied standard deviation and coefficient of variation (CV) to measure funding volatility and classify sector stability, converting quantitative findings into structured analytical insights.

AI-Powered Recipe & Meal Planning Application | 2026

- Developed a Python-based web application using Django, REST APIs, and OpenAI API to generate personalized recipes and 7-day meal plans from user inputs.
- Implemented database-backed storage, authentication, shopping-list extraction, recipe sharing, and asynchronous frontend interactions using JavaScript Fetch API.

Multilingual Translator Web Application | 2026

- Developed a Django application for multilingual text translation with dynamic forms, backend routing, and real-time translation using Python libraries.
- Implemented text-to-speech functionality using gTTS and playsound while following structured application development and coding practices.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Validation, Data Transformation, KPI Analysis, Trend Analysis, Statistical Analysis, Reporting

Programming & Data: Python, Pandas, NumPy, SQL, MySQL, Matplotlib

Data Visualization & BI: Microsoft Excel, Power BI, Dashboard Development, Data Visualization

Databases & Analytics: SQL Queries, Analytical Views, Data Aggregation, Data Filtering, Data Standardization

Web & APIs: Flask, Django, REST APIs, HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, Replit, Bolt, Cursor, Antigravity, Claude

CERTIFICATIONS

- Data Analytics — Deloitte | Jun 2025
- Technology — Deloitte | Jun 2025
- Python Basics — HackerRank | Jul 2025
- Web Development — Internshala | Jul 2025
- AI Aware — Intel | Aug 2025
